NAVY IS THE NEW BLACK

Flüff has navy on the brain! We can't help but notice it in our everyday surroundings: on the runway, in accessories, and in interiors. This deep hue is surfacing in the design world.

Universal among men and women, navy is now used as a neutral. Hold the black, bring on the navy.

Menswear is at the top of our inspiration list. From the navy blazer to tangerine ties, we are utilizing these handsome features in our new indigo collection. We are constantly absorbing inspirations through fashion, photography and nature.

Anticipating this coming trend, Flüff has created a navy collection including our Bandit pillow collection, custom art, and even furniture. Stay tuned for the arrival of our custom bold navy sofa.

Layering pops of colour will add depth and interest.

For a fresh look try pairing navy with bursts of tangerine, this contrast highlights navy's diverse range of use.

There are many ways of embracing navy as a neutral in your own world. See how Flüff interprets the navy trend by moving away from nautical sensation and more towards neutrals. One way is to incorporate it with other textures such as gold, chrome, and wood.

Flüff for Keeps allows you to take fresh trends and bring them into your home. We've made this process effortless by translating this season's inspirations into a well balanced look ready for you to grab and go. Come by and visit our showroom to see how you can introduce navy to your space and make it your own.
